
Job Description

Job title:	M&A Pricing Associate
Location:	London
Company:	Resolution Life Group Services Limited
Reports To:	M&A Pricing Principal

POSITION SUMMARY:

This role will form part of the central M&A and reinsurance team, with a primary focus on European and Australasian markets. Geographical focus may vary over time, depending on activity across the Resolution Group. The role will work closely with our reinsurance platform, Res Re and Resolution Australasia in pricing and evaluating M&A and reinsurance opportunities in European Markets. Extensive travel in Europe and potentially other locations required.

KEY ACCOUNTABILITIES:

- Providing technical support and input during M&A and reinsurance processes
- Carrying out assessments and quantification of potential risks and upsides of target portfolios
- Developing pricing methodologies as appropriate
- Managing and running pricing models
- Support special projects across the group head office
- To support the M&A team in ensuring that the company operates with the highest levels of integrity, skill, care and due diligence
- To work with MD and Head of Europe to ensure that the company complies with its financial, regulatory and legal obligations
- To ensure M&A technical support is effective and provided efficiently and to timescale
- To keep abreast of the latest developments in technical M&A actuarial skills
- To actively promote and uphold the values of the company
- To ensure that colleagues, customers, advisors and stakeholders are valued and treated with respect

EDUCATION

- Mathematics (or other numerate) degree
- Actuarial qualification

EXPERIENCE

- Actuarial life insurance advisory and M&A expertise

SKILLS

- Knowledge of the Resolution sector
 - Actuarial and M&A background
 - Ability to work as an individual contributor and take initiative to learn new things. You may work on something you haven't worked on before but are prepared to go and learn and find out about this area and build your knowledge
 - Ability to recognise potential conflicts and acknowledge where guidance is required / necessary
 - Ability to make recommendations and drive actions under own initiative, taking the lead in prioritising multiple requirements
 - Solutions driven
 - Robust to deal with setbacks
-

- Ability to work autonomously, with minimal supervision
 - Excellent ability to quickly build strong relationships with a broad network of stakeholders.
 - This includes self-awareness and goes beyond just the normal 'team work'. It's about us all being in this together and wanting to help people get the right answer
 - Excellent analytical skills
 - Excellent communication skills
-
